Subject : Revised guidelines for selection of customers for allocation of domestic gas from small/isolated fields-reg.

Sir,

In continuation of this office letter of even number dated 8th July, 2013 vide which revised guidelines for selection of customers for allocation of domestic gas from small/isolated fields were issued by the Ministry, I am directed to invite your attention to para 3(i) of the revised guidelines wherein it has been provided that **"Supplies to existing customers from small/isolated fields shall continue as per their APM allocations or the fallback non-APM allocations or both and shall be restricted at a level equal to the average supply made to such customers in the last six months. Revised Gas Supply Agreement for these quantities shall be finalised by the NOCs within 30 days. Gas supplies shall be made to the existing customers based on this level subject to availability of gas. NOCs shall charge the notified APM price for supplies made against APM allocation and at non-APM price, as notified by the Government from time to time, for the balance supplies (supply level frozen now minus the supply of APM gas)".**

2. It is requested to apprise this office with the action taken regarding para 3(i) of the revised guidelines, positively by 8th August, 2013.

Yours faithfully,

(Nikunj Kumar Srivastava)
Director

Subject : Allocation of domestic gas from small/isolated fields.

Sir,

In continuation of this office letter of even number dated 8th July, 2013 forwarding therewith revised "Guidelines for Selection of Customers for Allocation of Domestic Gas from small/isolated fields", I am directed to say that based on a clarification sought by ONGC on para 3(1) of the aforesaid guidelines, the matter has been re-visited and it has been decided with the approval of Minister (P&NG) to modify para 3(1) of the revised "Guidelines for Selection of Customers for Allocation of Domestic Gas from small/isolated fields" to the following effect:

"If the average drawal quantity in last six months of a customer drawing gas from small/isolated fields has been more than its allocation (APM and/or NON-APM allocation taken together), such excess quantity over and above its allocation shall be allocated on fall back basis. This additional fall back allocation shall be at non-APM price, as notified by Government from time to time. However, Gas supplies shall be made to the existing customers based on this level subject to availability of gas. Revised gas supply agreement for such additional allocated quantities shall be finalised by the NOCs within 30 days of issue of this clarification/modification. In case the average drawal in last six months of a customer is less than its allocation, then supplies to such customers from small/isolated fields shall continue as per their existing allocations/Gas Supply Agreements."

Yours faithfully,

(S.P. Agarwal)

Subject : Allocation of domestic gas from small/isolated fields.

Sir,

In continuation of this office letters of even number dated 8th July, 2013 and 30.8.2013 issuing the revised "Guidelines for Selection of Customers for Allocation of Domestic Gas from small/isolated fields" and subsequent clarification thereupon, I am directed to say that based on a communication received from ONGC seeking relaxation under Clause (2) of the above guidelines for regularisation of additional supplies of gas from some isolated fields, the matter has been re-visited and it has been decided to raise the threshold limit of peak production to a level of 0.2 mmscmd in the definition of small and isolated fields provided in clause 2 of the guidelines dated 8.7.2013.

2. This issues with the approval of Minister (P&NG).

Yours faithfully,

(S.P. Agarwal)
